

# SMc CURRICULUM WINTER MATH WORKSHOPS

GRADE 2  
through  
GRADE 5

## Improving Number Sense and Mathematical Fluency in Struggling Learners

*Students struggling with math in grades 2-5 are often grappling with two concepts: number sense and fact fluency. In this workshop, teachers and specialists will learn how to integrate strategies throughout their day to improve these two skills in their struggling learners and begin building a solid foundation that will allow them to comprehend basic concepts in grade-level work. Many strategies can be applied right away with little prep. Attendees will come away with resources for home-school connections as well as current apps and links to increase student achievement.*

**Trainer:**

**Jen Hunt**

SMc Curriculum Consultant

**Dates and Locations:**

**SOLD OUT** February 2, 2017 — Pendleton, OR

February 13, 2017 Tualatin, OR

**SOLD OUT** February 27, 2017 — Medford, OR

GRADE 6  
through  
HIGH SCHOOL

## Formative Assessments for the Common Core Math Classroom

*Formative assessments provide critical information for both students and teachers that helps shape and guide the learning and instruction in a classroom. Teachers who use thoughtfully designed formative assessments have the opportunity to create a culture where students are active in and responsible for their learning. In this workshop, teachers and coaches will learn strategies for designing standards-based formative assessments based on achievement level descriptors, depth of knowledge levels, Smarter Balanced claims, priority standards and proficiency levels. Participants will also learn strategies to use formative assessment data to guide the planning of interventions and extensions.*

**Trainer:**

**Sarah Parnell**

SMc Curriculum Consultant

**Dates and Locations:**

February 3, 2017 Pendleton, OR

February 14, 2017 Tualatin, OR

February 28, 2017 Medford, OR
